

# 1.40/1

## Product description

- For removing taper roller and ball bearings, inner bearing races, and other tightly-seated or thin-walled parts

Operation:

- To remove tightly-seated parts, the sharp edges of the separator blades are pressed behind the part and it is then withdrawn using the correct puller No. 1.38
- To avoid damage to delicate parts, the flat surfaces of the separator blades are used. This produces a large support surface that prevents deformation.

**Net weight:** 0.9 kg

**Spread range:** 12-75 mm

## Technical characteristics

- External connecting thread: M10
- for extractor: 1.38/1
